PROFESSIONAL SUMMARY

Full-stack developer with about 2 years of experience building secure, scalable, and reliable backend and frontend systems. Experienced in microservices-based architectures, event-driven systems, and real-time applications using technologies such as Node.js, TypeScript, PostgreSQL, MongoDB, Kafka, WebRTC, and AWS. Strong understanding of software design patterns, clean code, and maintainable system architecture, with hands-on experience deploying applications on AWS and VPS infrastructure. Also experienced in building AI-powered applications and working with LLMs, generative AI, and AI agents.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, TypeScript, C, Go, Java

Frontend: React, Next.js, Tailwind CSS, Redux, Zustand, React Native

Backend: Node.js, Express.js, Flask, FastAPI

Databases and ORMs: MongoDB, PostgreSQL, MySQL, Prisma ORM, TypeORM, Firebase

Cloud: AWS, VPS

Tools: Git, Docker, CI/CD, NGINX, Jira

EXPERIENCE

Backend Developer

Dec 2024 - present

MITRA Consultancy

Remote

- Collaborated in the architecture and design of a scalable distributed system for a talent showcasing social media app using both relational (PostgreSQL, MySQL) and non-relational (MongoDB) databases
- Implemented Kafka-based event-driven architecture (pub/sub).
- Implemented real-time communication features, including WebRTC-based audio/video calling with STUN/TURN servers and real-time chat using Socket.IO; developed payment workflows, scheduled cron jobs for subscription expiration and stale-record cleanup, and integrated AWS S3 for document storage.
- Handled 3 independently deployable microservices for payments, customer management and media services.
- Developed and maintained clean, reusable code following established coding standards and best practices, contributing to a custom internal library.
- Collaborated with frontend developers, participated in code reviews, and mentored interns to improve code quality and development practices.

PROJECTS

TutorSansar | *Node.js* , *Next.js*

www.tutorsansar.com

- Developed the MVP for a tutor matching platform for students and a personalised learning system.
- Features: auth, notification, cron jobs, VPS.
- Onboarded 100+ users

SpeakPix | *React Native*, *GPT-2*, *flask*

<https://github.com/Roshanchau/autism-app>

- Developed an interactive mobile application for people with autism, dyslexia, and learning issues to aid in social interaction and communication.
- Utilised React Native for cross-platform mobile development and GPT-2 LLM for next-word prediction.

Skillio | *Node.js*, *Express.js*, *PostgreSQL*, *TypeORM*, *Microservices*

at MITRA consultancy

- Developed a scalable backend service for a skills-showcasing social media app, including microservices, reels, chat, calling, payments, notifications, and content moderation features.
- Worked with multiple databases across services, using PostgreSQL for user and customer data, MySQL for payment transactions, and MongoDB for storing posts and reels.

IntelliDocs | *Python*, *FastAPI*, *AWS S3*

<https://github.com/Roshanchau/IntelliDocs>

- Developed a document-querying chatbot that enables users to upload documents and retrieve relevant information using natural language prompts.
- For instance, users can store legal or health-related documents and query about them anytime.
- Implemented document processing and storage with MongoDB and AWS S3.

ACHIEVEMENTS AND CERTIFICATIONS

- Winner of the Best Futuristic Implementation at IICQUEST 2024
- 1st Runner-Up at Hackathon organized by ACES Techfest 5.0
- Winner, NASA Space Apps Challenge (Local Level)
- Co-authored and published “Intelli-Docs: An AI-Powered Personal Document Assistant Using Retrieval-Augmented Generation and Multimodal Retrieval” in the Journal of Engineering Issues and Solutions, Vol. 5, No. 2 (2026).

EDUCATION

IOE Purwanchal Campus

Bachelor's in Computer Engineering

Dharan, Nepal

Aug 2020 - April 2025
