PROFESSIONAL SUMMARY

As a full-stack developer with over 2 years of hands-on experience, I specialize in developing secure and reliable frontend and backend systems. I have experience in working with micro-services by incorporating scalable patterns like the strategy/factory pattern, builders pattern, proxy pattern and opting for clean, readable coding practices. Leveraging these, I also have experience in deployment with cloud services like AWS, VPS. Furthermore, actively following developments in Large Language Models (LLMs), AI agents, and generative AI to design scalable and intelligent software solutions.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, TypeScript, C, Go, Java

Frontend: React, Next.js, Tailwind CSS, Redux, Zustand, React Native

Backend: Node.js, Express.js, Flask, FastAPI

Databases and ORMs: MongoDB, PostgreSQL, MySQL, Prisma ORM, TypeORM, Firebase

Cloud: AWS, VPS

Tools: Git, Docker, NGINX, Jira

EXPERIENCE

Backend Developer

2024 – present

MITRA Consultancy

Remote

- Collaborated in the architecture and design of a scalable distributed system for a talent showcasing social media app using both relational(PostgreSQL, MySQL) and non-relational(MongoDB) databases
- used Kafka for the implementation of event-driven architecture(pub/sub).
- implemented complex features like calling with complex WebRTC implementation (used STUN/TURN servers), chat with socket.io, payments, CRON for expiring subscriptions and deleting stale records/documents, used AWS S3 for storing documents, etc
- handled 3 different micro-services: payment service, customer service and media service.
- Wrote clean, readable and maintainable code adhering to coding standards and best practices, catering a custom library.
- Collaborated with frontend developers and participated in code reviews and mentored interns.

PROJECTS

TutorSansar | NodeJs, NextJs

www.tutorsansar.com

- Developed the MVP for Tutor matching platform for students and a personalised learning system.
- features: auth, notification, cron jobs, consensus, vps.

SpeakPix | React Native, gpt-2, flask

<https://github.com/Roshanchau/autism-app>

- Developed an interactive mobile application for people with autism, dyslexia, and learning issues to aid in social interaction and communication.
- Utilised React Native for cross-platform mobile development and GPT-2 LLM for next-word prediction.

Skillio | Node.js, Express.js, postgres, typeORM, Microservices

at MITRA consultancy

- Developed a scalable backend service for skills showcasing social media app, including microservices, reels, chat, calling, payments, notification, and content moderation features.
- used PostgreSQL for user/customer service, MySQL for payments, and MongoDB to store posts/reels

IntelliDocs | python, fast API, AWS S3

major project(<https://github.com/Roshanchau/IntelliDocs>)

- developed a document's querying chatbot, enabling users to upload and query documents using natural language prompts for our major project.
- For instance, users can store legal or health-related documents and query about it anytime.
- Implemented document processing and storage with MongoDB Atlas, AWS S3.

ACHIEVEMENTS AND CERTIFICATIONS

- Winner of the Best Futuristic Implementation in the IICQUEST 2024
- 1st Runner Up at Hackathon organized by ACES Techfest 5.0
- Local level NASA Space Apps winner

EDUCATION

IOE Purwanchal Campus

Bachelor's in Computer Engineering

Dharan, Nepal

Aug 2020 - April 2025
